JL; Ron Kessler did call me back on today's (his) "FBI Had Eye On Jack Ruby As Informant" story. He wrote the story even though someone at the conference had passed him a note saying that stuff was available in 1965. The rest he said was all old and unproved Mafia allegations. (I told him the actualy story of these reports) He went because he'd been assigned. Lardner is on vacation. Teh fact that there was any reporting confirms Lane's judgement that with a few respected names and crazy, old stuff he can get some attention. HW 7/25/75
